B. Agrometeorological Advisories for crop protection & management

C. General and Agrometeorological Advisories for (RRS Vyttila)

Proper drainage facilities have to be ensured. Special crop management is required for agricultural crops before monsoon season. If the soil is more acidic, add lime as per soil testing. Pesticides should not be applied during rainy period.

Crop	Pest/ Disease		Crop/ Animal Advisory			
Rice (Puncha)	Harvesting stage	Since there is a chance of lodging due to water logging, provide proper drainage facilities.				
Rice (virippu)	Land preparation	Land preparation and nursery for virippu paddy (Rainfed) can be started.				
Banana	Sigatoka disease	During rainy season, there is a chance of sigatoka disease in banana. As a prophylactic measure, spray 20 g Pseudomonas per one liter of water. Pesticides should not be applied during rainy period. Proper drainage facilities have to be ensured.				
Pepper	Foot rot	As a prophylactic measure to manage foot rot during rainy season, add 2 kg Trichoderma to a mixture of 90 kg FYM and10 kg neem cake and kept for two weeks with sufficient moisture. Add 2.5 kg of this mixture to the base of each matured pepper vine. Proper drainage facilities have to be ensured				
Animal	Avoid water logging near the cattle shed. Ensure proper ventilation in the cattle shed.					
Husbandry						
Poultry	The poultry shed should be kept free from moisture. Stir the litter occasionally and add fresh litter if required. (CAADECCS, KVASU, Mannuthy).
