Agro Meteorological Advisories

Crop	Stage of the crop / Pest/Disease	Advisories
Nutmeg	Fruit rot	Spraying 1% Bordeaux mixture can control the disease.
Cassava	Brown leaf spot	Wider spacing, balanced fertilizer application and clean cultivation help in restricting the development and spread of the disease. In severe disease conditions spray 0.1% carbendazim.
Arecanut	Bud rot	Infected tissues of bud should be scooped off and destroyed. Apply Bordeaux paste to the affected portion and cover with polythene sheet.
Betel vine	Foot rot	Soil application of <i>Trichoderma viride</i> enriched organic matter @ 5 kg/vine with the onset of the South West Monsoon.
