B. Agrometeorological Advisories for crop protection & management

C. General and Agrometeorological Advisories for Ernakulum District (RRS Vyttila)

Special crop management is required for agricultural crops during monsoon season. Proper drainage facilities have to be ensured. If the soil is more acidic, add lime as per soil testing. Pesticides should not be applied during rain.

Crop	Pest/ Disease	Crop/ Animal Advisory	
Paddy (Pokkali)	Management	Sowing can be done on already prepared mounts	
Paddy (Virippu)	Sheath blight / Leaf spot	As a prophylactic measure, either soak paddy seeds or dip the roots of seedlings in <i>Pseudomonas</i> solution @ 10g in a litre of water	
Coconut	Bud rot	Improve general condition of the palm by manuring and management. Clean the crown and remove rotten portions. Spray crowns and leaves with 1 % Bordeaux mixture as a prophylactic measure. For already infected palms, small perforated sachets containing 5 g Mancozeb may be tied to the top crown portion and 3 or 4 inner most leaf axils.	
Pepper	Foot rot	Foot rot As a prophylactic measure, add 2.5 kg Trichoderma enriche organic manure to each vine.	
Fisheries	Management	Fishes like carps (catla, rohu, mrigal, grass carp, silver carp, cpmmon carp), Tilapia, Channa sp., pearl spot, pangasins, anabas etc. can be cultured in fresh water ponds. Farmers can select Anabas and Tilapia as six month culture period species.
