B. Agrometeorological Advisories for crop protection & management

C. General and Agrometeorological Advisories for Ernakulum District (RRS Vyttila)

Prophylactic measures to control crop pest & diseases can be taken to avoid their spread. Proper mulching can be followed to conserve soil moisture.

Crop	Pest/ Disease	Crop/ Animal Advisory
Paddy (Pokkali)	Management	Measures for dewatering of excess water to be done. Reflective ribbons can be tied up above the crop canopy to ward off purple moorhens' damage.
Paddy (Mundakan)	Management	Continue land preparation, basal fertilizer application, transplantation etc.
Cool season vegetables	Planting and management	The season for cool season vegetables is from October to February. Well drained loose soil is preferred. Apply 2 Kg lime at the time of land preparation. Incorporate 100 Kg <i>Trichoderma</i> enriched farm yard manure / compost two weeks after the application of lime. Seedlings can be transplanted by the last of October or first week of November.

Fisheries: - As there are chances of PH fluctuations in pond water, apply lime on the bunds after testing the pond water. Rice research Station, Vyttila (Kerala Agricultural University) is having facilities to test water quality parameters of fish culture ponds.
