

Agromet Advisory Bulletin for the District, Kasaragod

(Issued jointly by Kerala Agricultural University Regional Agricultural Research Station Pilicode & India Meteorological Department)

Bulletin Number:	Pilicode/Ksd-66/2022	Date:18/08/2022
-------------------------	----------------------	-----------------

A. Weather Summary of preceding five days

Rainfall, mm	Max. temp., °C	Min. temp., °C	R. H., %	Wind speed, Km/h
0.0	31.0 – 32.0	24.0 – 24.3	84 - 89	01 - 02

B. Weather forecast for next five days

Parameters	19-08-2022	20-08-2022	21-08-2022	22-08-2022	23-08-2022
Rainfall, mm	0.5	0.6	1	10	8
Max. Temp, °C	31	31	31	31	31
Min. Temp, °C	24	24	24	24	24
Max. Relative Humidity, %	90	90	90	90	90
Min. Relative Humidity, %	66	66	66	66	66
Wind speed, km/h	6	6	5	5	5
Wind direction, degrees	270	290	270	270	290
Total cloud cover, octa	8	8	8	8	8

C. Agrometeorological Advisories

Crop	Stages	Problems	Agro-meteorological advisories	
	Light rainfalls **			
General conditions	There will be light rainfalls (up to 15.5 mm within a time span of 24 hours.) As per the extended rainfall forecast, there will be rain during the next week also. The sky will be cloudy. High relative humidity will be experienced. High atmospheric temperature and heat index will be felt during the rain free intervals.			
General Recommen dations	The prevailing climatic conditions may favour disease causing fungus to spread its fruiting bodies. Hence beware of diseases like rots and wilts in coconut, black pepper, banana, ginger etc. leaf blight and bacterial leaf blight in rice. Maintain hygiene conditions in crop fields. Infected and fallen nuts, leaves and tree parts should be removed from the fields and burnt.			

•	Flowering to milky stage		Strict vigilance is necessary at milky stage. Keep the field and bunds free of weeds and grasses.
			If attack is seen apply fish amino acid @ 20 ml/litre.
Paddy	All stages	Borwn spot disease	Prophylactic spray of <i>Pseudomonas</i> fluorescens (@ 20g/l) is recommended.
			If disease appears only, spray fungicide Nativo® (@ 4g per 10 litres of water)
Coconut	All stages		Detection of disease at its early stage will help to adopt efficient corrective measures. Cut and remove the affected tissues from the crown and apply Bordeaux paste. After that cover the cut surface with polythene sheets to protect it from rain falls until new leaf emerges.
			Burn the removed tissues immediately.
			As a prophylactic measure spray 1% Bordeaux mixture into the axils of top leaves of the surrounding palms
Black pepper	Newly planted/early	Quick wilt disease	Spray Redomil (@2g/litre of water) or copper oxy chloride (@3g/litre of water)
	growth stages		Drench the soil in the basins with the same preparation (@ 5 litre per vine) as mentioned above.
Banana	Various stages of growth	Sigatoka leaf spot	There should not be any water stagnation in the basins of the crop. As a prophylactic measure spray Pseudomonas (@ 20g/litre) at fortnight intervals.
			If disease appears:-Cut and burn all affected leaves. Spray Carbendazim and Mancozeb (@ 2ml per litre) alternatively at fortnight intervals

Ginger and Turmeric	All stages	Rhizome rot	Drain the field. Drench the field with 1% Bordeaux mixture.
Brinjal	Vegetative phase	Thrips	Spray "Raksha", the organic insecticide released by KAU (@10g/litre) on both surface of leaves and stem If attack is severe spray quinalphos @ 2g/l of water
Cow	Milking	Mastitis	The disease is common on cows which are sheltered in unhygienic conditions. Symptoms:- The symptoms are change in composition of milk and turning the milk into an yellow watery liquid, severe fever, lack of appetite, abortions etc. If not treated the cow may lose its milk yielding capacity permanently. Also the cow may lose mobility and gradually death may occur. Prevention:- Ensure hygienic conditions for the individual animals as well as their shelter and its surroundings. The milking machines should be cleaned properly after every use. Boost the immunity of cattle by supplementing feeds with vitamins and minerals containing health tonics. If disease appears, give medication under the supervision of a Veterinary doctor immediately.

** Warning colour codes of rainfall (for disaster management)

Warning (Take actions)

Alert (Be prepared)

Watch (Be updated)

No warning (No actions)
