

Agromet Advisory Bulletin for the District, Kozhikode (Valid from 25.05.2024 to 29.05.2024)

(Issued jointly by Kerala Agricultural University Regional Agricultural Research Station Pilicode& India Meteorological Department)

Bulletin Number:Pilicode/Kkd-42/2024	Date:24/05/2024
Dunctin Humber if incode, itha 12,202	Date:21/05/2021

A. Weather Summary of preceding four days

Rainfall, mm	Max. temp., °C	Min. temp., °C	R. H., %	Wind speed, Km/h
146.0	28.2 – 34.4	24.0 – 26.6	69 – 98	00- 12

B. Weather forecast for next five days

Parameters	30	10	12	18	10
Rainfall, mm	30	31	33	33	33
Max. Temp, °C	25	26	26	26	26
Min. Temp,°C	98	98	98	98	98
Max. Relative Humidity, %	69	69	69	69	69
Min. Relative Humidity, %	20	12	4	4	5
Wind speed,km/h	320	320	320	290	290
Wind direction, degrees	8	8	8	8	8
Total cloud cover, octa	30	10	12	18	10

C. Agrometeorological Advisories

Crop	Stages	Problems	Agro-meteorological advisories
General conditions	Isolated heavy to very heavy rainfall ** Isolated heavy to very heavy rainfall. The sky will be cloudy. High relative humidity will be experienced. The atmospheric temperature will come down. There will be isolated heavy to very heavy rainfalls (From 115.6 mm to 204.4 mm within a time span of 24 hours) on May 24 th . There will be isolated heavy rainfalls (From 64.5 mm to 115.5 mm within a time span of 24 hours) on May 25 th . There will be light to moderate rainfalls (From 15.6 mm to 64.4mm within a time span of 24 hours) from May 26 to 28.		
General Recommen dations	Harvest all the ripened fields quickly. Do not heap the harvested products in the field itself. Take care while drying the harvested rice directly under the sun, especially during the afternoon periods. Take care while drying the harvested products like rice, rubber, copra, pulses, vegetable seeds, etc directly under sun. Give popping to all soft slender stemmed crops like banana, vegetables, climbers etc. Clean the		

drainage channels in crop lowlands to enable proper drainage of excess water in case of exigencies if any. Do not shelter the cattles in shelters having weak structures. Keep animal feeds, seeds, fertilizers etc. in termite free and moist free rooms on elevated platforms coated with wooden pannels. Avoid activities under open field conditions during 12 AM to 3 PM on the days with high temperature. Also avoid activities under open conditions while there is lightning. Also do not expose livestock to such unfavorable weather conditions. Preparations to plant seedlings of tree crops can be started. The pits can be taken if there is sufficient moisture content in the soil. Ensure proper distance between the plants. The $^2/_3$ portions of the pits should be filled with the mixture of topsoil and powdered dry cow dung/compost. Spraying should be done when there is no rainfall Paddy If the level of soil moisture content in the paddy field is optimum for Main Land preparation (Viruppu: ploughing, the tilling operations can be started. With the first ploughing itself, incorporate powdered FYM/compost or green manures (@ 5t/ha) First crop season) to the soil. Rhinoceros beetle Take out the beetles from the attacked Coconut All stages palm crown using beetle hook. Swab the hole made by the beetles with Bordeaux paste to prevent entry of fungus through the cut surface. Old fishnets can be reused for controlling the pest. Cut the nets into pieces of size 1m x 0.5m. Keep the middle portion of Dwarf varieties and young the net, lengthwise into the axils of 3rd palms are more vulnerable and 4th leaf whirls of the palm. Push the to the attack. net firmly with small stones into the axils. The hanging sides of the net should be kept open. The beetles will be trapped in the nets and get destroyed. Care should be taken to move the nets to upper leaf axils accordingly while fresh leaves are emerging. All stages Bud rot Detection of disease at its early stage will Coconut help adopt efficient corrective measures. Cut and remove the affected tissues from the crown and apply Bordeaux paste. After that cover the cut surface with polythene sheets to protect it from rain falls until new leaf emerges. Burn the removed tissues immediately. a prophylactic measure Trichoderma cakes of spray 1% Bordeaux mixture into the axils of top leaves of the surrounding palms

Black pepper	Planting	Wilt disease	As prophylactic measure, apply 150 gram of Trichoderma enriched neem cake - cow dung mixture in the basins of the vines and incorporate thoroughly with the soil.
Banana	All stages	Pseudostem weevil	Ensure field sanitation. Apply EPN infected Cadaver (@ 4 numbers per plant) in the middle whorls of the leaves during 5th and 6th months after planting (Cadaver is available at KAU Banana Research Station, Kannara. Contact number: 9605758722)
Areca nut	Bearing Stage	Mahali disease	Apply Bordeaux mixture (1%) to the bunch and leaves.
Ginger/ Turmeric	Sowing	Rot and wilt diseases	As a precaution, use Trichoderma enriched Farm Yard Manure. OR Apply Trichoderma directly onto the moist soil (@ 25g each of Trichoderma per every 100 square meters of the seed bed).
Livestock (Cows/Goats)	Milking	Mastitis	The disease is common on cows which are sheltered in unhygienic conditions. Prevention:- Ensure hygienic conditions for the individual animals as well as their shelter and its surroundings. The milking machines should be cleaned properly after every use. Boost the immunity of cattle by supplementing feeds with vitamins and minerals containing health tonics. If disease appears, give medication under the supervision of a Veterinary doctor immediately.
