Wind direction (deg)	238	230	230	230	230

#### Agro Meteorological Advisories

Crop	Pest/Disease	Advisories
Paddy (Panicle stage)	Rice bug	Apply neem based pesticides (3ml per one liter of water). Pesticides application should be done either before 9 am or after 3 pm. Otherwise, the pesticide application will adversely affect the pollination.
Banana	Pseudostem weevil	Apply 2% neem oil-garlic-soap emulsion in the starting stage. In case of severe attack apply 3ml Chlorpyrifos in 1 liter of water on the pseudostem mixing with gum.
Vegetables	Powdery mildew	Symptoms of powdery mildew include yellow spot and white flour on leaves and leaf burn. It can be prevented by applying wettable sulphur 3-4 g in one liter of water.
