

# **KERALA AGRICULTURAL UNIVERSITY**

# PROSPECTUS FOR ADMISSION TO M.Sc. WILDLIFE MANAGEMENT

2024-25

## 1. INTRODUCTION

This course provides an in-depth exploration of the principles, practices, and challenges of wildlife management. Through a combination of theoretical lectures, hands-on activities, field visits, and research projects, students will develop the knowledge and skills required to effectively manage and conserve wildlife populations and their habitats. The course will prepare the students for a rewarding career in wildlife management, conservation, and sustainable development, contributing to the protection of wildlife and the preservation of natural ecosystems. It is expected to provide the students a solid foundation to understand the complexities of wildlife management and contribute effectively to this field. The students have access to various national parks, wildlife sanctuaries, and protected areas, allowing them to gain hands-on experience in wildlife conservation and management in a real-world setting. The field of wildlife management offers a wide range of career opportunities in various sectors, including government forest/wildlife departments, non-profit organizations, research institutions, environmental consulting firms, and wildlife tourism.

## 2. <u>COURSE OBJECTIVE</u>

- Producing skilled professionals who can actively contribute to wildlife conservation, research, policy development, and sustainable management of natural resources.
- Understand and explain key ecological concepts and principles relevant to wildlife management.
- Design and implement wildlife research projects, employing appropriate field and laboratory techniques for data collection and analysis.
- Collaborate effectively with professionals from diverse backgrounds to address complex wildlife management challenges
